

# VERMONT WEEKLY INFLUENZA SURVEILLANCE REPORT

January 15-21, 2017 | MMWR Week 3

## KEY POINTS

Influenza activity was categorized as **regional** for MMWR Week 3

- Levels of Influenza-like Illness (ILI) activity seen in emergency departments remain the same as Week 2
  - Of the total emergency room visits, **2.9% were due to ILI**
- Sentinel providers reported **1.28% of patients had ILI**
- Vermont Department of Health Laboratory reported **29 positive flu tests**
- National Respiratory and Enteric Virus Surveillance System reported **36 positive flu tests**
  - **11.1% were flu B**
- **1 outbreak reported** from a long-term care facility in the Northwest Flu Region during Week 3
- Increase in reports of positive flu cases from hospitals

## FLU SURVEILLANCE SEASON

**START**  
MMWR Week 40  
(Week End Date 10/08/16)

**END**  
MMWR Week 20  
(Week End Date 5/20/17)

# Syndromic Surveillance of Influenza-Like Illness (ILI) at Vermont Hospitals, 2016-2017 vs. Historic Data

# Sentinel Provider Data From ILINET

Sentinel providers report the number of patients with an ILI seen by their practices each week

ILI is defined as a fever of at least 100° F and cough and/or sore throat, without a known cause other than influenza

There are 13 medical practices located throughout the state currently partnering with the Health Department as sentinels

## Percent of Visits Reported by Vermont Sentinel Providers\* with Influenza-like Illness by MMWR Week, 2013/14 – 2016/17 Flu Seasons

# Percent of Visits Reported by Vermont Sentinel Providers\* with Influenza-like Illness by Age Group by MMWR Week, 2013/14 – 2016/17 Flu Seasons

# Percent of Visits Reported by Vermont Sentinel Providers\* with Influenza-like Illness by Age Group by MMWR Week 2016/2017 Flu Season

# Vermont Department of Health Laboratory (VDHL) and National Respiratory and Enteric Virus Surveillance System (NREVSS)

Individual influenza laboratory results are not reported to the Vermont Department of Health. The data below represents an unknown subset of the actual number of flu tests done in Vermont

VDHL tests specimens for flu to identify exactly which strains are currently causing illnesses in the state. Flu testing at the state laboratory is for surveillance purposes and completed on specimens submitted to VDHL

NRVESS data is collected from collaborating university and community hospital laboratories. These participating laboratories report positive results for a number of viruses, including influenza, on a weekly basis. Three Vermont hospitals contribute data into this system and is voluntary

	VDHL* Current Week (Jan 15-21, 2017)		VDHL* 2016-2017 Season Total (Oct 2, 2016-Jan 21, 2017)		NREVSS* Current Week (Jan 15-21, 2017)		NREVSS* 2016-2017 Season Total (Oct 2, 2016-Jan 21, 2017)	
	Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
